

# Filter Nozzle & Vaccume Breaker

# Filter Nozzles

We provide a large assortment of Plastic Filter Nozzle that includes flower type filter nozzles as well as water filter nozzles. These are available in different shapes and sizes and can be availed to our clients at affordable prices.

## Features

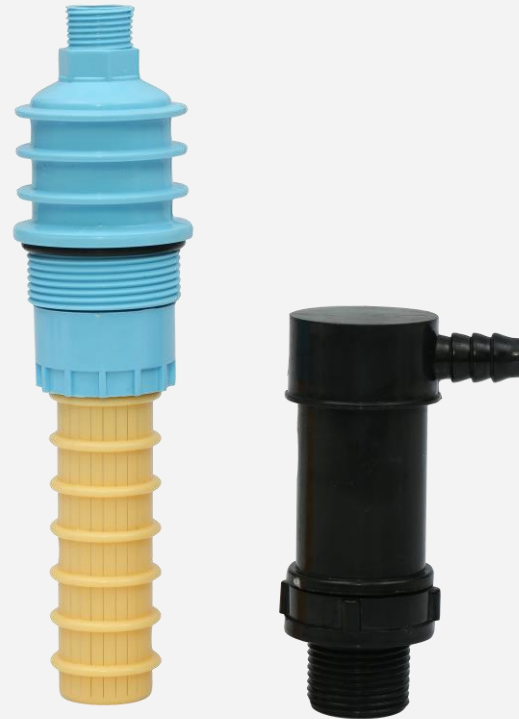

- Excellent flow & pressure drop characteristics
- PP, PVDF, Glass filled PP and etc.
- Slot size available from 0.2mm to 1.0mm
- Standard & Customized design with accessories like Check Nuts, Washer, Expanding Self Locking Nut etc.

# Vacuum Breaker

The Vacuum breaker protect the Tank and face piping during the operation by preventing negative pressure in tank.

Fiberglass/Composite pressure vessels are rated for internal negative pressure of 5 inches Hg (17Pa) Vacuum below atmospheric. Vacuum breaker must be installed between pressure vessel inlet and any valves. For Enclosed tank application, the vacuum breaker should be installed at highest location in the system plumbing.

# Thanks!
